## Sake

The quality of Japanese sake can be simply graded from the milling/polishing rate of the rice being used in the brewing process. The higher the polishing rate tends to mean the more premium the quality & a more refined taste. A cleaner & sharper finish is created on the palate – eliminating fats, proteins & amino acids that result in unwanted flavours & aromas.

### Sake tasting set

A selection of premium Japanese sakes ranging from semi dry, dry and super dry. 3 glasses, 60ml each 30

### House Specialty Sake

Located at the base of Akagi Mountain in the middle of the main island of Japan, this sake brewery is a family owned & operated business. In making this sake they use spring water from the mountain that is very smooth & the sake has a dry finish. This is the first overseas export for this sake, so we are very proud at Azuma Japanese Restaurant to have the opportunity to offer it to our guests.

## Shochu

---

Shochu, not to be confused with sake, is one of japan's most popular indigenous alcoholic drinks. a distilled beverage made from such ingredients as sugar cane, rice, barley or sweet potato. a strong natural flavour, dependent on the raw ingredient used, it has been described as having a 'nutty' and 'earthy' flavour, shochu production in japan is centred on kyushu, okinawa and surrounding islands. Shochu usually has an alcoholic content of around 25% but can range up to more than 45%.
