SAKE

The quality of Japanese sake can be simply graded from the milling/polishing rate of the rice being used in the brewing process. The higher the polishing rate tends to mean the more premium the quality & a more refined taste. A cleaner & sharper finish is created on the palate – eliminating fats, proteins & amino acids that result in unwanted flavours & aromas.

Sake Flight

A selection of premium Japanese sakes ranging from semi dry, dry and super dry. 3 glasses, 60ml each 30

Sake Selection

Located at the base of Akagi Mountain in the middle of the main island of Japan, this sake brewery is a family owned & operated business. In making this sake they use spring water from the mountain that is very smooth & the sake has a dry finish. This is the first overseas export for this sake, so we are very proud at Azuma Japanese restaurant to have the opportunity to offer it to our guests.

SHOCHU

Shochu, not to be confused with sake, is one of japan's most popular indigenous alcoholic drinks. A distilled beverage made from such ingredients as sugar cane, rice, barley or sweet potato. A strong natural flavour, dependent on the raw ingredient used, it has been described as having a 'nutty' and 'earthy' flavour, shochu production in japan is centred on kyushu, okinawa and surrounding islands. Shochu usually has an alcoholic content of around 25% but can range up to more than 45%.
